

## Answer on Question #79431, Chemistry / General Chemistry

### Question:

Which of the following statements is true?

- A. The rate of all chemical reactions doubles for every 10 °C increase in temperature.
- B. Decreasing the activation energy of a reaction decreases the reaction rate.
- C. Catalysts increase the reaction rate without getting used up in the reaction.
- D. All of the Above
- E. None of the Above

### Answer:

- C. Catalysts increase the reaction rate without getting used up in the reaction.
