Question 21551 a green marble is placed in a bag with 99 other marbles of various colors. which of the following could never be in the probability that the green marble is randomly chosen from the bag, regardless of the color of the other 99 marbles? A. 20% B.0.7 C.3/4 D.2

Solution. By the definition a probability of some event is number between 0 and 1, hence the right answer is D, since $2 \notin [0, 1]$.
