Answer on Question #49166 – Math – Algebra

If a membership is $58 and the start up fee is $129 and I spent $651, for how many months is my membership?

Solution.

After paying the start up fee, the money decreases to $651-$129=$522.

To calculate the number of months in the membership, we must divide the sum of money by a membership fee: $522/$58=9.

Answer: 9 months.
