

Answer on Question #53313 – Math – Algebra

Question

A set of magnets costs \$6.40. The store is offering a 10% discount on the magnets. Alicia buys 2 sets of magnets with the discount. Assuming there is no tax, How much money does Alicia pay for the 2 sets of magnets?

Solution

Alicia paid the following sum of money:

$$S = \$6.4 \cdot 2 \cdot 0.9 = \$11.16$$

Answer: \$11.16.
