

Answer on Question #58894 – Math – Trigonometry

Question

Just the answer please.

Fill in the blank. In the triangle below, $z^\circ =$

Solution

$$\frac{x}{35} = \tan 52^\circ \rightarrow x = 35 \tan 52^\circ \approx 44.80;$$

$$\frac{35}{y} = \cos 52^\circ \rightarrow y = \frac{35}{\cos 52^\circ} \approx 56.85;$$

$$z^\circ = 90^\circ - 52^\circ = 38^\circ.$$

Answer: $z^\circ = 38^\circ$.

Question

Just the answer please.

Fill in the blank. In the triangle below, $x = \underline{\hspace{2cm}}$. Round your answer to two decimal places.

Solution

$$\frac{x}{35} = \tan 42^\circ \rightarrow x = 35 \tan 42^\circ \approx 31.51;$$

$$\frac{35}{y} = \cos 42^\circ \rightarrow y = \frac{35}{\cos 42^\circ} \approx 47.10;$$

$$z^\circ = 90^\circ - 42^\circ = 48^\circ.$$

Answer: $x = 31.51$.
