Answer on Question #61705 – Math – Algebra

Question

nine weeks into the 2009 major league baseball season, nyjer morgan of the Pittsburgh pirates had been up to bat 175 times. he got a hit 2/7 of the time. how many hits did nyjer have?

Solution

$b = 175$ times in the season

He got a hit 2/7 of the time, hence

$$n = 175 \cdot \frac{2}{7} = 50$$

Answer: $n = 50$.
