

## **Answer on Question #63238 – Math – Algebra**

### **Question**

The Nile river is 6690 kilometers long. This is 394 kilometers longer than the Amazon River. How long is the Amazon River?

### **Solution**

The Amazon River is 394 kilometers shorter than the Nile river:  
 $6690 - 394 = 6296$  kilometers.

### **Answer:**

6296 kilometers.
