

## **Answer on Question #63280 – Math – Algebra**

### **Question**

1. If a frog can hop 48 feet in 4 seconds, how many feet can hop per second?

### **Solution**

To find hop speed of fog, we can use the following formula:

$$48/4 = 12 \text{ (ft/sec).}$$

### **Answer:**

Fog can hop 12 feet per second.
