## Answer on Question \#64365 - Math - Abstract Algebra

## Question

Show that $x^{2}+x+4$ is irreducible over $\mathbb{Z}_{11}$.

## Solution

Since the polynomial has degree 2 , it is irreducible over a field if and only if it has no roots in the field. Let's check that:

|  | 0 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $x^{2}+x+4$ | 4 | 6 | 10 | 16 | 24 | 34 | 46 | 60 | 76 | 94 | 114 |
| $\mathrm{x}^{2}+\mathrm{x}+4(\bmod 11)$ | 4 | 6 | 10 | 5 | 2 | 1 | 2 | 5 | 10 | 6 | 4 |

We used Reducibility Test for Degrees 2 and 3 to prove that the given polynomial is irreducible over the given field.
