

Answer on Question #67371 – Math – Statistics and Probability

Question

You are going to test the claim at least 60% of women do the income taxes for their household.

If you use a significance level of 0.05,

what will the critical number be for your rejection region?

See Table A-2 for your answer

Answer:

$$z_{crit} = z_{0.05} = 1.645.$$
