Question #75152, Math / Algebra

Construct the truth table for the compound statement (p logical and tilde q logical) and tilde r

$$(p \cup (\sim q)) \cup (\sim r)$$

Solution

1. First, the operations of logical not:

| а | ~a |
|---|----|
| 0 | 1 |
| 1 | 0 |

2. Then go to the logical and:

| а | b | $a \cup b$ |
|---|---|------------|
| 0 | 0 | 0 |
| 0 | 1 | 0 |
| 1 | 0 | 0 |
| 1 | 1 | 1 |

3. In brackets (p logical and tilde q logical), then the remaining action, the entire expression.

| р | q | r | $\sim q$ | ~ <i>r</i> | $p\cup(\sim q)$ | $(p \cup (\sim q)) \cup (\sim r)$ |
|---|---|---|----------|------------|-----------------|-----------------------------------|
| 0 | 0 | 0 | 1 | 1 | 0 | 0 |
| 0 | 0 | 1 | 1 | 0 | 0 | 0 |
| 0 | 1 | 0 | 0 | 1 | 0 | 0 |
| 0 | 1 | 1 | 0 | 0 | 0 | 0 |
| 1 | 0 | 0 | 1 | 1 | 1 | 1 |
| 1 | 0 | 1 | 1 | 0 | 1 | 0 |
| 1 | 1 | 0 | 0 | 1 | 0 | 0 |
| 1 | 1 | 1 | 0 | 0 | 0 | 0 |

Answer:

| р | q | r | $(p \cup (\sim q)) \cup (\sim r)$ |
|---|---|---|-----------------------------------|
| 0 | 0 | 0 | 0 |
| 0 | 0 | 1 | 0 |
| 0 | 1 | 0 | 0 |
| 0 | 1 | 1 | 0 |
| 1 | 0 | 0 | 1 |
| 1 | 0 | 1 | 0 |
| 1 | 1 | 0 | 0 |
| 1 | 1 | 1 | 0 |
