

Answer on Question #75317 – Math – Algebra

Question

The profit on a jacket can be found by the formula $p=24x - 125$, where x is the number of jackets sold. What is the profit if 15 jackets are sold?

Solution

$$p = 24 * 15 - 125 = 360 - 125 = 235$$

Answer: The profit is 235.
