Algorithm of a program that finds the minimum of three values.

```
typeT FindMaxFromThree(typeT a, typeT b, typeT c) {
        typeT max = a;
        if (b > max) max = b;
        if (c > max) max = c;
        return max;
}
```
